INFOBIP INTERNSHIPS 2022

Dear students,

We are pleased to announce the internship program organized by Infobip in 2022. Apart from the fact that you will be able to acquire theoretical and practical knowledge with the support of mentors from various fields, after completing the program, there is a possibility of employment in a global IT company.

Who is Infobip?

At Infobip we value creativity, persistence, and innovation. Since 2006, we have been innovating at the edge of technological possibilities and are now shaping global communications of the future. With a communications platform that reaches 7+ billion transactions monthly and 4+ billion devices worldwide, we ensure you can connect with your favorite brands through your preferred channels.

What can you expect?

- paid internship
- possibility of employment after completing the program, based on evaluation and monitoring the progress through the entire program
- working on real projects with the support of mentors
- working in agile teams where you will besides working on a project, have a chance to enjoy and meet Infobip culture through events and common activities at Infobip
- relaxed and friendly environment

About program:

Below you can read basic information about the program and application. Also, we kindly recommend a visit to our [Internship web page](#).

Software Engineering Internship

- This year's program is global and includes 4 countries (Croatia, Bosnia & Herzegovina, Slovakia, Poland).
- 2-Months paid software engineering internship program will take place through July and August and include practical work on a real project with dedicated mentors [add location](#).
- Through 9 weeks participants will learn about program languages Java, Spring, Spring Boot, Javascript (React or Vue) or C#, .NET Core, designing software projects with high quality, technologies like Git, Maven, and Jenkins, projects lifecycle from creating a project to establishing full product service including alerting, monitoring, high availability/load balancing, etc., and many other topics.
- All students in bachelor's and master's final years can apply.
- Direct links for application on the [Software Engineering Internship](#) can be found [here](#).
- Deadline for application is **the 3rd of April 2022**, and the internship start date is **the 4th of July 2022**.

“

“An egoless and humble mentality, the idea that we're just starting, the thought of being crazy artists who learn by doing - that's the culture we've built together.”

Silvio Kusic
CEO

We are looking forward to meeting you!
